HARD VETO — CAPITAL MUST NOT BE ALLOCATED HERE

ARCIL (NEUTRAL, score 59) — **Value Trap** — RoNW 13.9% is below its 15.8% cost of equity (spread -1.9pp). Score capped at 59; not an APPLY for long-term capital.

FUNDAMENTAL SCORECARD

MPIMANIPAL	54	NEUTRAL	30.1x	34x	0.89x	—	22.9%	15.2%	28%

EV/EBITDA carries more of the valuation score as capital intensity rises; it is meaningless for lenders, whose borrowings are raw material. A high % OFS means the money goes to selling holders, not into the business.

ANCHOR LOCK-IN — DAY-30 SUPPLY RISK

Symbol	Names	Patient	Flippers	Day-30 float +	Trigger	Verdict
RENTOMOJO	8	75%	25%	37.3%	30%	LOW

SEBI releases 50% of the anchor allocation at 30 days and the rest at 90. Supply only matters if the holders will sell, so the warning needs both a large float expansion and a flipper-heavy book.

Excluded from the plan

- **PRASOLCHEM** — score 57 below cutoff 61
- **ARCIL** — Value Trap: RoNW 13.9% is below cost of equity 15.8%; composite capped at 59
- **MPIMANIPAL** — score 54 below cutoff 61
